

Welcome to Mississauga Data

This report and other related documents can be found at www.mississauga.ca/data.

Mississauga Data is the official City of Mississauga website that contains urban planning related reports, newsletters, brochures and data. The Information Planning Research Unit manages statistical data including: population, demographics, census, development monitoring/activity, growth forecasts, housing, employment, office, land use, vacant employment lands, and the environment.

Visit our Publications and Open Data Catalogue to find our complete inventory of our freely available information products.

Sheridan

Community Profile

History

The hamlet of Sheridan was originally named "Hammondsville", after David Hammond, a local resident who settled the area prior to 1820. However, there was already a Hammondsville elsewhere in Ontario, and the hamlet had to change its name in order to have a local post office. A local blacksmith suggested "Sheridan", after Irish playwright Richard B. Sheridan. The name Hammondsville is still remembered today in Hammond Road, which is still located east of Erin Mills Parkway.

As the hamlet was located in the vicinity of the present day Winston Churchill Boulevard and the Queen Elizabeth Way, its history is shared between Peel and Halton Regions.

The post office actually moved across current regional boundaries, depending upon which store it was located in. The only reminder of the hamlet of Sheridan left today is the Sheridan Cairn, located at the Winston Churchill/QEW interchange in Oakville. The marker was constructed in May 1986.

Sheridan was originally designated for residential, commercial, open space, golf course and industrial uses in the 1950s. Until 1965, lands in the Sheridan residential district were used primarily for farming, with a few scattered orchards and some residential development along Liruma Road. In 1967, the United Land Corporation planned and build the

residential community as we know it today. The construction of Sheridan Mall followed in 1968. Since that time Sheridan has developed into a stable and mature residential community.

Table 1 - 2001 Total Population

	Sheridan	Mississauga	Sheridan as a % of Mississauga

Table 3 - Population by Ethnic Origin (Single Responses)

Ethnic origin refers to the ethnic or cultural origins of a person's ancestors. An ancestor is someone from whom a person is descended and is usually more distant than a grandparent. It is not the same as place of birth, citizenship or nationality. People who responded to more than one category were counted as multiple responses.

Rank	Ethnic Origin	Sherdian	%	Mississauga	%	Sheridan as a % of Mississauga
1	Canadian	1,285	7.6%	43,835	7.2%	2.9%
2	English	1,155	6.8%	24,780	4.1%	4.7%

Table 25 - Individual Average Income (Age 15 Years and Over)

	Sheridan	Mississauga
Male	\$59,986	\$43,010
Female	\$31,920	\$26,845

Average Income—see Table 25. Refers to the average total money received from the following sources during calendar year 2000 by persons 15 years of age and over: wages and salaries; net farm income; net non-farm income from unincorporated business and/or professional practice; federal Child Tax benefits; Old Age Security pension and Guaranteed Income Supplement; benefits from Canada or Quebec Pension Plan; benefits from Unemployment Insurance; other income from government sources; dividends, interest on bonds, deposits and savings certificates, and other investment income; retirement pensions; superannuation and annuities, including those from RRSPs and RRFIs; other money income.

The data presented in this community profile is from a custom tabulation of 2001 Census of Canada data prepared for the City of Mississauga by Statistics Canada. It is calculated from 20% sample data. This data does not include the institutional population or the 4.0% census undercount.

Statistics Canada assigns data for an enumeration area to a single representation point. Where these representation points occurred in close proximity to the boundary of a planning district, data may have been inappropriately assigned to the planning districts. Some reassignments of data to planning districts were made to correct this situation. This occurred most often for residential areas adjacent to an industrial area. Adjustments were made to the Statistics Canada population data based on adjustments to the dwelling unit allocations. When dwelling unit reallocations were made, the associated population were also reallocated.
