Churchill Meadows

Community Profile

History

The Churchill Meadows Residential District was originally part of the Town of Oakville and designated for agricultural uses. With the advent of Regional Government in 1974, the City of Mississauga was established and Churchill Meadows was incorporated through the extension of its westerly boundary to Ninth Line.

The Official (Primary) Plan of 1981 identified the major land uses for this area as residential for the lands north of Eglinton Avenue West (Winston Churchill Residential District) and mixed industrial and commercial for the lands located south of Eglinton Avenue West (Central Business District). In 1987 City Council released the two areas for the preparation of secondary plans and the

processing of development applications. From 1987 to 1997 draft secondary plans were prepared and the two areas were combined into the Churchill Meadows Planning District. During this time the last remaining greenfield was occupied by several working farms, along with individual residences along the east and west sides of Tenth Line West and the east side of Ninth Line.

In 1997 urban design guidelines were prepared for the Churchill Meadows Planning District providing direction to the public and private sectors with respect to the design intent of the City in regards to this area. The main principles of the guidelines include a diversity of housing types and

mix of uses, a connected system of natural features, parks, schools and stormwater management facilities, a grid pattern of streets and the creation of neighbourhood units. Lands in the north and south part of the planning district are under construction and applications for the central area are currently being processed.

Table 3 - Population by Ethnic Origin (Single Responses)

Ethnic origin refers to the ethnic or cultural origins of a person's ancestors. An ancestor is someone from whom a person is descended and is usually more distant than a grandparent. It is not the same as place of birth, citizenship or nationality. People who responded to more than one category were counted as multiple responses.
