CITY OF MISSISSAUGA
PLANNING DEPARTMENT

ITEM:
FILE: Employment/S.P. 205
DATE: September 7, 1982

TO S. Mahoney, Chairman, and Members of the City of Mississauga Planning Committee

FROM R.G.B. Edmunds, Commissioner of Planning

SUBJECT Report on Employment in the City of Mississauga - 1980

COMMENTS 1. BACKGROUND

Achieving a balance between employment opportunities and the skills of the resident labour force is a goal established in the Mississauga Official Plan. In order to monitor the extent to which this goal is being achieved, the Planning Department conducts an annual survey of employers in the City. The 1980 Employment Study differs from previous studies in that a complete survey of all commercial, industrial, and institutional establishments was undertaken instead of updating new firms to an employment base established during 1976-1977. The 1980 survey, which will provide the bases for future studies, also assigns additional information to the base data file which will allow a more comprehensive analysis of the type and number of employment opportunities in Mississauga.

The survey was carried out with assistance from the Economic Section of the Region of Peel Planning Department. The results of the survey were tabulated using municipal computer services.

2. DEFINITIONS

Employment

This term is used to identify the number of full-time and part-time on-site and off-site employees working for an individual operation or within a defined geographical area. The employment estimates provided in this report indicate the number of people working in Mississauga in 1980, whether or not they lived there. Thus, the employment figures provide an estimate of the City work force, i.e., the total number of people employed in Mississauga.

Employer

This term includes all commercial, industrial and institutional establishments located in the City in 1980 that employed one or more persons.

Manufacturing and Wholesaling (M&W)

For the purpose of this report, and consistent with the definitions contained in the Official Plan, this term refers to operations engaged in activities which are defined in the Standard Industrial Classification (SIC) Manual as industry numbers 101 to 399, 602 to 629 (see Appendix 1).

Retail, Service and Construction (RSC)

This term includes construction, retail trade, finance, insurance, real estate, community services, business and personal services, public administration, transportation and utilities as well as primary industries. These RSC activities are identified in the Standard Industrial Classification Manual as industry numbers 001 to 099, 404 to 579, 631 to 999.*

3. EMPLOYMENT CHARACTERISTICS

Employees

- As of December 1980 the number of people in the work force was estimated to be 156 589. This is an increase of 1 676 or 1.1% over the 1979 total of 154 913.
- The Manufacturing and Wholesale sector (M&W) underwent an increase of 2 056 or 3.1% over the 1979 figure of 67 181. It accounted for 69 237 employees or 44.2% of the total work force, - compared with 43.4% in 1979.

* In studies undertaken by the Region of Peel prior to 1979, the "Industrial" sector was defined as numbers SIC 001-626 inclusive and the "Service" sector as industry numbers SIC 631-999 inclusive.

- The Retail, Service and Construction sector (RSC) decreased 380 or .4% to 87 352 employees compared with the 1979 total of 87 732. This sector accounted for 55.8% of the total work force, compared with 56.6% in 1979.

Employers

- In 1980, the number of employers decreased to 7 185, a decrease of 545 or 7.1% over the 1979 total of 7 730.
- In the M&W sector, the number of employers decreased by 285 or 10.5% to 2 421 from 2 706 in 1979. This sector accounted for 33.7% of the total number of employers in 1980 compared with 35.0% in 1979.
- In the RSC sector, the number of employers decreased by 260 or 5.2% to 4 764 in 1980 from 5 024 in 1979. This sector therefore accounted for 66.3% of the total number of employers, compared with 65.0% in 1979.

Distribution of Employers by Number of Employees

As is shown in Table 1 most of the employers in Mississauga operate small size establishments in terms of the number they employ. Overall, 2 922 or 40.7% of all establishments in Mississauga employed 4 or less employees. These establishments, however, only accounted for 7 401 employees or 4.7% of the total employment in Mississauga.

Of the remaining employers, 23.9% employed 5-9 workers, 15.5% employed 10-19 workers, 12.5% employed 20-49 workers, 4.1% employed 50-99 workers, 2.5% employed 100-299 workers, 0.5% employed 300-499 workers, 0.2% employed 500-999 workers and 0.1% employed 1000 or more workers.

Nineteen establishments employed 500 or more workers. Taken as a whole, although these larger size employers constitute only 0.3% of all establishments, they accounted for 34 204 employees or 21.8% of the total employment.

Distribution of Employers by Categories

Tables 2 and 3 present a further breakdown of the RSC and M&W sectors by major activities within those sectors. Those activities with the greatest proportion of employers in the RSC sector include; retail trade (34.6%), personal services (16.3%) and services to business (10.9%). The greatest proportion of employment comes from the following RSC activities; retail trade (18.7%), public administration (18.3%), transportation/communication and utilities (14.1%), services to business (11.1%) and personal services (10.3%). Within the M&W sector, manufacturing constitutes 72.4% of the employers and 85.7% of the employees. Wholesale activity constitutes 27.6% of employers and only 14.3% of employees..

Spatial Distribution

Table 4 shows the distribution of total employment in 1980 by planning district. Similar information is shown by traffic zone in Table 5. Total employment information by planning district is presented graphically in Map 1, while Map 2 graphically presents the same information by traffic zone.

Overall, the planning district of Airport South had the greatest concentration of total employment with 22 443 or 14.3%. Traffic zone 109 (Toronto International Airport) accounted for the highest concentration of employment with 11 645 or 7.4%.

The highest concentration of M&W employment by planning district occurred in the Airport Road District with 13 715 employees or 19.8% of M&W employment. The traffic zone with the highest concentration of M&W employment occurred in zone 100 (Airport South) with 7 517 employees or 10.9% of the total M&W employment.

MAP 2
 Distribution of Employment
 in Mississauga
 by Peel Traffic Zone
 1980

NOTE:
 TO PRESERVE CONFIDENTIALITY FOR
 EMPLOYERS, TRAFFIC ZONES 36,37,38,77,
 86,88,95 AND 121 FOR WHICH ONLY ONE
 EMPLOYER WAS REPORTED HAVE
 NOT BEEN SHOWN ON THIS MAP.

- In terms of the distribution of employment by size of employers, the greatest proportion of total employment occurred in the large size employers. Those establishments with 500 or more employees employed 21.8% of the total employment.
- The total employment in 1980 exceeded the total labour force found in the City.

CONCLUSION

The results of the 1980 survey indicate that overall employment has increased in Mississauga but the number of employers have decreased slightly. It has been indicated statistically that the City of Mississauga is achieving one of its Official Plan goals, which is to expand job opportunities to equal the resident labour force.

RECOMMENDATION

That the report dated September 7, 1982, on employment in Mississauga, be received and forwarded to the Region of Peel for information.

The highest concentration of RSC employment by planning district occurred in the Toronto International Airport with 11 677 employees or 13.4% of total RSC employment. The traffic zone with the highest concentration of RSC employment occurred in zone 109 (Toronto International Airport) with 11 645 or 13.3% of the total RSC employment.

Labour Force

The size of the resident labour force was estimated to be 155 241,* an increase of 9 741 or 6.7% over the 1979 figure of 145 500. Therefore, with an increase of 1 676 jobs in 1980, a surplus of approximately 1 348 jobs existed in Mississauga. There were more job opportunities in Mississauga than could be filled by the resident labour force.

5. SUMMARY

- Total employment increased from 154 913 in 1979 to 156 589 in 1980. Total employment in the M&W sector increased while the RSC sector decreased.
- The M&W sector accounted for 43.4% of the total employment while the RSC sector accounted for 56.6%.
- The number of employers decreased from 7 730 in 1979 to 7 185 in 1980. Total employers in both the M&W and RSC sector decreased.
- The M&W sector accounted for 33.7% of all employers while the RSC sector accounted for 66.3%.
- The highest concentration of employment is found in the Airport South District with a total of 22 443 employees.
- Employers tend to operate small size establishments, with almost two thirds (64.6%) employing 9 or less workers and only 0.3% employing 500 or more workers.

Estimates of Labour Force participation includes all persons in the population 15 years of age or over multiplied by the Statistics Canada labour participation rate for 1980.
